

APPENDIX A-147

METHOD OF COMPUTATION CODES

1. Number of characters: One.
2. Type of Code: Alpha/Numeric.
3. Explanations: These codes identify GFM items and items requiring GFM. For all DSCs other than DPSC-T, they are used only as a means of identifying types of items. In addition, for DPSC-T, these codes are used to indicate the method of computation to be used in forecasting the item (POI, GFM, or demand-oriented), to recalculate mechanical Size Tariff values, and to recalculate mechanical Replacement Rates.
4. Source: The code is manually entered in the Supply Control File via the Supply Management Data Change Transaction, DIC ZR2.
5. The following codes are assigned:

<u>CODE</u>	<u>EXPLANATION</u>
A	Program Oriented (initial issue and replenishment) Government Furnished Materiel (GFM) supported, sized item.
B	Program Oriented (initial issue and replenishment), sized item. (Manufactured with Contractor Furnished Materiel (CFM).)
J	Program Oriented (initial issue and replenishment) <u>GFM</u> <u>supported</u> , nonsized item.
K	Program Oriented (initial issue and replenishment) nonsized, (CFM).
L	Program Oriented (replenishment) <u>GFM</u> supported, sized item.
M	Program Oriented (replenishment) GFM supported, nonsized.
N	Program Oriented (replenishment) sized item (CFM).
P	Program Oriented (replenishment) nonsized item (CFM).
C	Demand Oriented, GFM supported, sized item.
D	Demand Oriented, sized item. (Manufactured with CFM.)
G	Demand Oriented, GFM supported, nonsized.
Q	Demand Oriented, CFM supported, nonsized.

<u>CODE</u>	<u>EXPLANATION</u>
E	GFM item - <u>supports end-items only</u> .
H	GFM item, supports end items and issued directly to Service.
F	Numeric Stockage Objective.
Z	New item to DSC management.
